

Ladányi RUBEN

My first encounter with content creation was in the video team at MABIM, and since then I have enjoyed every moment and challenge. Every day I strive to improve myself and produce the best work I can. The process of creating, whether it's animation or logo design, is something that completely engages me.
I have been interested and engaged in programming since high school, especially web development and frontend. Although I haven't worked in this field yet, I am constantly expanding my knowledge in my spare time. For me, every detail is important; if something is not perfect, I prefer to take the time to fix it. My goal is always to satisfy the client and to make their vision a perfect reality.
